PROFESSIONAL SUMMARY

Computer Science and Engineering graduate (June 2026) seeking an entry-level Customer Support, Customer Care, Sales Operations, or Digital Operations role. Fluent in English and Hindi, with structured problem-solving, careful information handling, and clear documentation. Built an interactive CRM prototype and responsive web interfaces; Python and SQL foundations in progress. Customer-focused and detail-oriented: confirms the issue, validates records, communicates verified next steps, follows process guidance, and escalates exceptions when needed. Fresher in formal full-time employment.

CORE COMPETENCIES

- **Customer Support:** Active listening, issue clarification, professional English/Hindi communication, customer-focused service, clear explanation of verified next steps, accurate case notes, resolution follow-through, escalation awareness, SOP adherence
- **Sales and Digital Operations:** CRM workflows, lead capture and qualification, pipeline stages, owner assignment, priority management, follow-up scheduling, record maintenance, status updates, outcome tracking
- **Data Quality and Problem-Solving:** Attention to detail, data accuracy, information validation, completeness checks, structured troubleshooting, quality checks, clear handoffs, time management, teamwork, adaptability, feedback-driven learning
- **Workflow Discipline:** Checklist/SOP adherence (foundational), accurate notes and status updates, task prioritization, confidentiality awareness, exception escalation
- **Technical Skills:** HTML5, CSS3, JavaScript, React, TypeScript, Tailwind CSS, TanStack Start, Vite, Git/GitHub, VS Code, Convex, Python fundamentals (learning), SQL and relational database basics
- **Computer Science Foundations:** DBMS, OOP, data structures and algorithms, operating systems, computer networks, CRUD workflows, client-server concepts

SELECTED PROJECTS

LeadFlow CRM - Interactive Lead and Follow-up Management Prototype

TanStack Start, React 19, TypeScript, Tailwind CSS, Convex | Demo: https://myxjmy2dxc1t9v1llmlaa48m.macaly.dev/

- Built an interactive CRM prototype that moves inbound opportunities through New, Contacted, Qualified, Proposal, Won, and Lost stages, making pipeline status, ownership, follow-up dates, and next actions easy to review.
- Implemented create, edit, and delete workflows with Convex-backed data; searchable and filterable records; owner and priority assignment; drag-and-drop stage movement; pipeline and table views; lead details and activity; and follow-up queues.
- Added dashboard indicators for open pipeline value, qualified opportunities, attention items, won/lost value, and win rate, plus validation, confirmations, and loading/empty/error states for reliable record handling.
- Added a guided four-step walkthrough covering lead capture, contact, qualification, follow-up assignment, proposal progression, and outcome recording. Demonstrates record accuracy, prioritization, consistent follow-up, and business outcome tracking.

AI Customer-Support Assistant - Python Demo (In Progress)

Python fundamentals

- Developing a laptop-runnable learning demo where a support agent enters a customer message and follows a structured flow: understand the issue, prepare a response draft, and identify cases needing human review or escalation.
- Keeps the human agent in control through response review, fact verification, editing, and a resolve-or-escalate decision; emphasizes clear language, avoiding unsupported promises, and flagging uncertainty. Learning project, not a deployed production AI system.

Personal Portfolio Website and Recruiter-Focused UI Concept

HTML, CSS, JavaScript, React, TypeScript, Tailwind CSS, Vite | github.com/prajjwal-ptl/prajjwal-portfolio | github.com/prajjwal-ptl/prajjwal-portfolio-v2

- Created a multi-page portfolio with Home, About, Projects, and Contact navigation, plus JavaScript interactions for navigation and visual feedback.
- Built a separate responsive React/TypeScript portfolio interface with project filters, skills overview, contact actions, reusable UI patterns, and a conceptual AI Studio screen. Used Git/GitHub for source control and focused on clear information hierarchy and usability.

EDUCATION

B.Tech, Computer Science and Engineering | Oriental College of Technology, Bhopal (RGPV) | Graduated June 2026 | CGPA: 7.73/10
Relevant coursework: Database Management Systems (DBMS), OOP, Data Structures and Algorithms, Operating Systems, Computer Networks

TRAINING AND LANGUAGES

- **Training:** IBM Cognitive Class - SQL and Relational Databases 101; Python programming fundamentals and project development (in progress)
- **Languages:** English (fluent), Hindi (native)
- **Availability:** Immediately available for Bengaluru on-site roles; open to discussing rotational shifts and process requirements
